"Advances in the Therapy of Systemic Scleroderma."

Sofia, Suvremenna Meditsina, Vol 13, No 9, 1962; pp 40-43.

ABSTRACT: Review of the literature on treatment of multiple sclerosis, with some comments from personal experiences, as on relskin which, as Belisine of the French company "Substantia" was used by authors in 1 case with success; no side effects; EDTA; stigmasterol, PABA, and many other drugs. According to the authors, over 50 different therapeutic methods have been advocated in various recent publications in the world literature including some Bulgarian advocates of nivalin; but no treatment seems to be universally successful. 37 Western, 1 Soviet, 2 Bulgarian reference.

1457. (378) ELONGATING ARTHRODESIS OF THE KNEE-JOINT (Bulgarian text) - Boichev B. Orthopaed Dept., Inst. for the Specialization and Post-grad. Educ., Sofia, Bulgaria - KHIRURGIYA (Sofia) 1958, 11/1 (28-32)

- Arthrodesis combined with elongation may be indicated in paralytic extremities.
- Conforty proposed a procedure whereby a 'Z' elongation of the femur and tibia through the joint followed by skeletal traction met these two requirements simultaneously. The author proposes 4 other possibilities, in all of which the basic principle is to follow up resection of the articular surfaces of the knee joint by distraction of the 2 bones as much as is needed, and to fill up the gap with bone graft material. In one case the author keeps the bones distracted with 2 solid grafts, and fills up the gap with bone chips and with material taken from the patella. Another possibility is to keep the bones distracted by means of a special acrylic hollow cylinder with an opening through which the gap may be filled up with bone chips. In the third case the gap is kept distracted and filled up with a few solid bone grafts interposed between the 2 bones. In a fourth modification, the author fills up the gap with a solid piece of bone taken from the bone bank or from a fresh cadaver.

BOYCHINOV, A.

Pharmacognostic monograph on *Primula officinalis* and *P. elatior* with investigation about the composition of the drugs prepared from them. A. Boichinov. *Annuaire Univ. Sofia, Fac. phys.-math., Livre III*, 41, 81-89 (1944-45). — Data of pharmacognostic significance about *P. officinalis* and *P. elatior* are presented. A method for detg. the hemolytic index of *Radix Primulae* and *Flores Primulae* is described. The saponins from the plants were obtained by extg. them with  $\text{Et}_2\text{O}$ , treating with 5%  $\text{AcOH}$  soln. to free the saponins, and then extg. with  $\text{EtOH}$  under reflux; the  $\text{EtOH}$ -ext. was coned. *in vacuo* and  $\text{Et}_2\text{O}$  was added to the alc. soln. to ppt. the saponins. G. Meguerian
